

There is an unprecedented need to develop, manufacture, test and distribute safe and effective vaccines to fully control the COVID-19 pandemic. The International Society for Vaccines (ISV) is launching a virtual congress series as the leading platform for key COVID-19 vaccine developers to share their progress and for the global vaccine community to contribute their collective wisdom so the entire world can enjoy the benefits of vaccine protection in the near future.

Co-Chairs

Linda Klavinskis, ISV
King's College London

Margaret Liu, ISV
ProTherImmune

Shan Lu, ISV
U Mass Med School

Speakers

Kwok-Yung YUEN
HKU

Nicholas Jackson
CEPI

Kate E. Broderick
