

# VACCINES SYMPOSIUM:

THE BLOOMSBURY SET®  
Science | Economics | Technology

Combatting infectious disease & antimicrobial resistance

**Thursday 14th January 2021 - 1.30pm to 3pm**

Join us online for the third in a series of four symposia presenting the knowledge exchange projects supported by The Bloomsbury SET:

## Introduction to the Bloomsbury Set

The Bloomsbury SET

## Vaccination research to commercialisation: the funder's perspective

Dr Phil Packer, Innovations Lead AMR & Vaccines, Innovate UK

## Development of low-cost glycoconjugate vaccines for pigs

Dr Brendan Wren, Professor of Microbial Pathogenesis and Dean of Faculty of Infectious & Tropical Disease, London School of Hygiene and Tropical Medicine

## Development of a poultry vaccine platform based on transgenic coccidia parasites and evaluation of immunoprotection against necrotic enteritis

Dr Virginia Marugan-Hernandez, Research Fellow in Vaccinology, Royal Veterinary College

## Multi-disciplinary research for the strategic and translational development of late-stage tuberculosis vaccine candidates

Professor Richard White, Professor of Infectious Disease Modelling, London School of Hygiene & Tropical Medicine

## Panel discussion and audience Q&A

Chaired by Professor Dirk Werling - Professor of Molecular Immunology, RVC

Please register via **Eventbrite** by 13th January 2021
